

HAI / FAA Safety Team presents:

Scenario-Based Training for Pilot Decision-Making Course at HELI-EXPO 2013

Scenario-based training (SBT) is a system that incorporates real world experiences that are scripted to meet flight training objectives from a specific operational context. It can be utilized for initial training to more advanced operations. This approach allows the opportunity to improve pilot decision-making skills in a targeted operational context. This course covers the limitations of human decision-making as it applies to pilots and demonstrates the use of various scenario based training approaches.

Registration is not required for this course. HOWEVER, if you wish to receive FAA WINGS Program credit you MUST register in advance of the course on the FAASafety.gov web site.

This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2013. Safety Challenge course are FREE to all HELI-EXPO 2013 attendees. Courses are offered in 4 different safety tracks: Flight Operations, Maintenance/Technical Issues, Safety Culture/Leadership and Safety Management.

Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2013 and receive a certificate of recognition for completing the 2013 HAI Rotor Safety Challenge.
